

GIVE ENERGY MAKE SMILES

The Pauser's Reset

You reset through stillness.

YOUR STYLE

When life gets loud, your wisest move is to get quiet. Pausers recharge by turning down the noise and giving their nervous system room to settle. You do your best thinking in stillness, and a few intentional minutes of quiet can change your whole day.

YOUR 3 STEP RESET

The 90 Second Settle

1

Feet on the floor

Plant both feet flat, rest your hands in your lap, and soften your shoulders. Feel the weight of your body in the chair.

2

Box breathing

Breathe in for 4 counts, hold for 4, out for 4, hold for 4. Repeat 4 rounds. Let each exhale be slow and complete.

3

Name it

Silently name what you feel in one word: tired, tense, sad, wired. Naming an emotion loosens its grip.

MAKE IT YOURS

Keep a quiet corner, a candle, or a favorite blanket as your reset spot. Even 90 seconds counts.
